EXPERIENCE

2019 - Current

FULL STACK DEVELOPER
Celfocus

On frontend I use technologies like JavaScript, TypeScript, CSS, SASS, JSP and React. On backend I use Java 7 and 8, Spring, Spring boot, Maven as a dependency manager. About database I use Oracle SQL. For version control I use git and Bit Bucket and GitLab being the repositories where I maintain the code. Also, I use other technologies like docker to run the environment locally and jenkins to perform deploys. About architecture, I work with monoliths and micro services, where is also use SOAP and REST API to consume and send data.

2018

GIS TECHNICIAN
Eri engenharia

2017 - 2018

SURVEYOR
Viamapa

EDUCATION

2021-2024   **Bachelor of Game Development Engineering**
Instituto Politécnico Cavado e Ave

2018   **Intensive bootcamp programming**
Academia de código

2015-2017   **Master of Geospatial Engineering**
Faculdade Ciências da Universidade do Porto

2010-2015   **Bachelor of Geospatial Engineering**
Faculdade Ciências da Universidade do Porto
